■ Projects

ABISSMAL — Open Source Behavioral tracking platform

11/2021 - Present

Automated Behavioral tracking by Integrating Sensors that Survey Movements Around a target Location is a hardware and software platform (Raspberry Pi, Python, Bash, R) for automated behavioral tracking with built-in system monitoring and error logging. ABISSMAL also provides the capacity to make behavioral inferences by integrating data across multiple types of movement sensors. We tested the tracking system by tracking parental care behaviors with captive zebra finches that raised young birds over 50 days. Github repository: <https://github.com/lastralab/ABISSMAL>

■ Submitted Manuscript

Smith-Vidaurre, G., Molina, T., Jarvis, E.D., and Hobson, E.A. (2023). Automated tracking of avian parental care behavior. Submitted. EcoEvoRxiv preprint: <https://doi.org/10.32942/X2Z60C>

■ Accomplishments

- Collaborated with a team of 4 in the development of the Veem Payment Module for Magento 2 ([Module](#) in Magento Marketplace)
- Earned a 35% salary raise within 5 months due to outstanding work performance while working at Gamma Partners (now PK Global)
- Got sponsorship at Wacom and traveled to San Francisco, CA to attend the **Lesbians Who Tech Summit** in 2022. I was able to engage with a diverse community of LGBTQ+ professionals and allies, gaining valuable insights into the latest trends, innovations, and challenges in the tech industry
- Got sponsorship at Johnson Controls to attend the **Adobe Summit** in Las Vegas, in 2023. Throughout the event, I participated in insightful sessions, hands-on workshops, and witnessed discussions led by industry experts and tech leaders. These experiences not only expanded my knowledge but also challenged me to think creatively and strategically in my approach to eCommerce Development

■ Languages

- Bilingual in English and Spanish (speaking, reading and writing)
